

\$AVE SF's CLIMATE ACTION PLAN!

Rally at City Hall front steps
Wed., February 25, 12 noon

Demand strong climate action from elected leaders.

Politicians, including the mayor, claim they almost never hear climate concerns from constituents. People do care - they just don't speak up that much. Time to change that.

The situation is urgent.

The current City budget proposal mandates such drastic cuts to SF Environment Department (SFE) that 7.8 full-time-equivalent staff positions *disappear* in July: most of its climate program staff, with years of climate action expertise. **At extreme risk:**

- Climate action planning & performance oversight
- Building electrification, including the Climate Equity Hub
 - Elimination of gas-fired landscaping equipment
 - EV charging • Biodiversity

Also at risk are millions in future grants. Since 2022-23, General Fund support - though tiny! - of SF Environment Dept. has brought in \$29 for every dollar invested.

Spending on SFE is leverage, not overhead.

During his campaign, the mayor wrote that "we need large scale public sector investments in climate infrastructure and electrification" and that he "will prioritize climate action not just in words, but in dollars and policy." He ignored his own words.

People expect San Francisco to *lead* - but on this all-encompassing issue we are going backwards. **San Franciscans need to know what's really happening.** Please come to City Hall front steps Feb 25th at noon and show your commitment to strong local climate leadership. Bring a banner if you have one!

In San Francisco, the buck stops with Mayor Lurie.

We need to remind him.
